# Why Schlau Automation?

**German-Inspired Engineering:** We don't just sell gadgets; we provide engineering excellence. Our products are built with high-grade components that ensure lightning-fast response times, superior durability, and glitch-free performance for years to come.

**Aesthetics That Define Luxury:** Technology should look as good as it works. Our products feature premium toughened glass, sleek metallic frames, and minimalist designs that seamlessly blend with your interior decor, adding a touch of modern elegance to your walls.

**Unmatched After-Sales Support:** Our relationship doesn't end at installation. We pride ourselves on responsive customer service and technical support, ensuring that your smart home remains smart, always.

## Our Vision

---

To redefine modern spaces with intelligent security and seamless automation, making every Home smarter, safer, and more luxurious.

## Our Mission

---

To bridge the gap between luxury and technology. Our mission is to curate smart living experiences where security meets style, giving you complete control over your environment with just a touch.

Available in Glass, Metal & Matte finishes

# For Your New Home

Glass Touch Switches for New Homes

Available in 03 different sizes

Available in 5 different colors: White, Black, Silver, Copper & Gold

# Smart Touch Panel

The Smart Touch Panel is not just a switch; it is an intelligent control interface designed to replace traditional plastic switches. Crafted with high-grade toughened glass, it allows you to control lights, fans, and appliances with a feather-light touch, a mobile app, or even your voice.

## Key Features

- Premium Tempered Glass:** Scratch-resistant, waterproof, and easy to clean.
- Capacitive Touch Technology:** Responds instantly to a gentle touch, similar to a smartphone screen.
- Remote Access:** Control your appliances from anywhere in the world using the app.
- Voice Control Compatibility:** Works seamlessly with Amazon Alexa and Google Home.
- Backlit LED Indicators:** Soft LED glow makes it easy to locate switches in the dark without disturbing your sleep.
- Scene Customization:** Create moods like "Party Mode" or "Movie Mode" with a single tap.

# Smart Door Lock

A high-tech lock for your main door that does not need a physical key. You can open it using your finger, a code, or your phone. It is designed to make your home safer and smarter.

## Key Features

- **5 Ways to Unlock:** Fingerprint, PIN Code, Mobile App, RFID Card, and Mechanical Key.
- **Auto-Lock:** The door locks itself automatically when you close it.
- **Safety Alarm:** A loud alarm rings if someone tries to break the lock.
- **Premium Look:** The sleek black glass design makes your entrance look luxurious.
- **Guest Access:** Send a temporary code to your maid or relatives so they can enter even if you are not home.
- **Strength:** Strong Lock body with hardened SS 304 bolts.

## Video Door Phone (VDP)

VDP is a smart doorbell system with a camera outside and a screen inside. It lets you see and talk to the person at your door without opening it.

### Key Features

- **HD Color Screen:** A clear display inside your home to see visitors.
- **Night Vision:** The camera sees clearly even in total darkness.
- **Two-Way Talk:** Speak to the visitor from inside, just like a phone call.
- **Photo Capture:** Automatically takes a photo of anyone who rings the bell.
- **Smart Unlock:** A button on the screen to open the digital lock instantly.

# Smart Motorized Curtains

A smart track system that opens and closes your curtains automatically. You don't need to pull them by hand anymore—just use a remote, your phone, or your voice.

## Key Features

- **Multiple Control Options:** Works with Touch Panel, Mobile App, Alexa, and Google Home.
- **Touch Motion:** Just give the curtain a gentle pull, and the motor takes over to open or close it fully.
- **Schedule Timers:** Set a time for the curtains to open in the morning and close at night automatically.
- **Silent Motor:** The motor runs smoothly and quietly without disturbing your sleep.
- **Heavy Duty:** Strong enough to move even large, heavy velvet curtains easily.

## Home Theatre

A complete entertainment setup that brings the big cinema experience into your own house. It combines high-quality sound, a giant screen, and smart automation to create a private movie hall for your family.

## Speakers

A high-performance Dolby Atmos system that fills your room with powerful 360-degree sound from every direction, placing you right inside the movie scene.

## Projectors

A state-of-the-art 4K laser projection system designed to transform your living space into a private cinema. It delivers a massive, crystal-clear 150-inch display with vibrant colors and razor-sharp detail, offering an immersive viewing experience that far surpasses any standard television.

## CCTV Camera

A smart wireless camera that acts as your digital eye. It lets you watch live video of your home or office directly on your phone, from anywhere in the world.

### Key Features

- **360° Rotation:** The camera lens moves up, down, left, and right to cover the entire room. No blind spots.
- **Color Night Vision:** Sees clearly in total darkness, so your security doesn't stop at night.
- **Two-Way Audio:** Comes with a mic and speaker. You can hear what's happening and talk back through the camera.
- **Human Detection:** Smart AI detects humans instantly and sends an alert to your phone. It ignores birds or flying leaves.

# Smart Sensors

**Auto Fire Extinguisher:** A proactive safety device that detects and suppresses fire automatically before it spreads.

**Smoke Detector:** Detects the earliest traces of smoke and fire, giving you crucial time to act before a small flame becomes a disaster.

**Gas Leak Sensor:** Instantly detects invisible LPG or CNG leaks in your kitchen, preventing potential explosions and keeping your home fire-safe.

**Anti-Theft Alarm:** Uses advanced acoustic technology to detect the sound of shattering glass, triggering an alarm before an intruder can even step inside.

**Motion Sensor:** Smartly detects human movement to automatically turn lights on/off, saving energy while doubling as a security sentry when you are away.

**Temperature Sensor:** Constantly monitors room climate to automatically adjust your air conditioning or fans, ensuring perfect comfort levels day and night.
